

I want to know the rainfall status in Tokyo.

Please see Tokyo Amesh.

Tokyo Amesh provides color-coded information on rainfall in Tokyo and the surrounding areas, and is updated in real time. Amesh also has a function to replay all rainfall data from the previous two hours up to the present time.

A smartphone version of Tokyo Amesh has been available for download as of April 2017. Use this app when you are going out, or to prepare your household against flooding in times of heavy rains.
